

Swyve Age Verification Policy

Effective Date: [20th October 2025]

Last Updated: [20th October 2025]

Purpose

Swyve is an adult-only platform. This Age Verification Policy outlines how we ensure that only individuals who are at least 18 years old (or the legal age of majority in their jurisdiction) can access or contribute content.

1. Who Must Verify

- All content uploaders and creators must complete identity verification before uploading any material.
- Users accessing adult content may be required to verify age depending on their country's regulations.

2. Verification Methods

We verify age using a third-party ID verification provider. You may be asked to provide:

- A valid government-issued photo ID
- A selfie or biometric confirmation
- Location information to determine applicable legal requirements

3. Country-Based Rules

Some countries (e.g., Germany, France, UK, certain U.S. states) require stricter verification for adult content access. Swyve adjusts verification procedures to meet local laws and reserves the right to block access where required.

4. Storage and Security

Verification data is processed securely by our trusted third-party vendor. Swyve does not permanently store ID photos. We only retain age confirmation tokens and anonymized logs as needed for compliance.

5. Failure to Verify

Users who do not complete age verification when required will be denied access to restricted areas of the platform. Creators must remain verified at all times to keep publishing content or receiving payouts.

6. Appeals and Corrections

If your verification fails in error, you may contact support to appeal the decision or correct documentation.
